JBW Group International Helps Client Achieve ISO 27001 Certification

Antares Management Solutions passes third-party audit

Minneapolis, MN, December 10, 2009 – JBW Group International Inc. president and CEO, John B. Weaver, announced today that the collaborative efforts between JBW Group and Antares Management Solutions (Antares) headquartered in Strongsville, Ohio, have resulted in ISO 27001 certification for Antares. Antares Management Solutions is a subsidiary of Medical Mutual of Ohio, and provides custom, turn key management solutions for insurance, healthcare and other vertical markets. JBW Group directed the effort to implement an Information Security Management System. Because Antares was already ISO 9001:2000 certified, JBW Group worked with the Antares team to utilize processes already in place and shortened the 27001 implementation project life-cycle. Using a proven implementation methodology, JBW Group facilitated the identification of critical business processes, and developed strategic risk management strategies for critical information assets. Consultants from JBW Group assisted with organizing the existing information security program into an ISO-compliant framework.

JBW Group International partnered with key leadership personnel at Antares who provided the executive sponsorship for this important initiative. “Antares’ careful selection process identified JBW Group as the partner we needed to ensure the success for this project,” said Ken Sidon, President of Antares.

Antares has implemented an Information Security Management System in compliance with International Standard ISO 27001 as the foundation for an ongoing repeatable process for continuous improvement and security vigilance. It’s this level of due diligence that makes Antares stand out among their peers. “By assisting Antares in meeting the requirement of today’s leading industry standards, we assure our customers that their critical information is protected through controlled policies, procedures and best practices,” said Bill Clark, Antares Quality Manager. “The JBW Group team has helped us to realize this key strategic objective.”

SRI Quality System Registrar was the auditing body for Antares. Christopher Lake, President of SRI, observed, "The collaboration and partnership between Antares and JBW Group International was a model for the successful implementation of an ISMS and ISO 27001 conforming system. The outcome demonstrates the skill, expertise, and commitment of everyone involved."

JBW Group has assisted other clients with a variety of information assurance activities. JBW Group experts have significant experience in all aspects of Information Security. These areas include policy and governance, privacy, legal and regulatory compliance assessment, business continuity management, incident response and many other areas that form a holistic approach to information security management.

About International Standard ISO 27001

ISO/IEC 27001 describes an information security management standard for organizations that is quickly growing in popularity around the world. The basis for the standard is that an organization's most valuable asset is its information. As a valued asset, information must be managed and protected from internal and external threats. In order to protect its information assets, the organization must develop sustainable security measures and integrate those measures into its business processes.

About JBW Group International Inc.

JBW Group International was founded in 2002 to provide Information Security solutions to businesses and institutions in financial, telecommunications, healthcare, technology, manufacturing, energy and government. The JBW Group methodology incorporates internationally recognized standards including ISO 27001, ISO 20000 and ISO 28000. This methodology is process-oriented, focuses on the strategic objectives of the client and incorporates the concepts of quality management and continuous improvement, all with the objective of protecting the confidentiality, integrity and availability of critical information assets. Please visit the company's web site at www.jbwgroup.com for more information.
